

Why Choose a StoryPhones MP3 Audio System or Player?

Listening to songs and audio stories is a well established means of supporting a child's learning. Just as digital cameras have revolutionised the way images can be used in schools and nurseries, MP3 players and digital audio are making it so much easier to listen to and play audio resources. StoryPhones MP3 players are:

Versatile:

- StoryPhones MP3 players have no wires and use rechargeable batteries.
- You can plan to have lots of different listening activities taking place at the same time.

Mobile:

- StoryPhones MP3 players can be used indoors or outside.
- Wire free players allow your children to listen anywhere.

Durable:

- StoryPhones MP3 players are robust; they don't snap, there are no parts to pull off. The foam pads are securely fastened and extremely difficult for little fingers to remove.
- Child friendly and easy to use.

Responsive

- You can use StoryPhones MP3 players for as many individual activities as you wish.
- You can plan for group activities.
- Children can listen quietly or out loud.
- Activities can be child or adult led.

Inclusive:

- Any child can access the audio resources, regardless of reading or writing ability.
- Recording gives children a different way to record their own stories and ideas regardless of reading or writing levels.

Today's Technology:

- StoryPhones uses technology in a creative way to give children a versatile tool to extend and enhance their learning.
- MP3 technology reflects the technology children are using in their own homes and gives children without access to MP3 players the opportunity to explore the ways they can make learning fun.
